Mr. Steve Sullivan  
President  
Genco Masonry  
4853 Cordell Ave, Penthouse 6  
Bethesda, MD 20814

Mr. Sullivan,

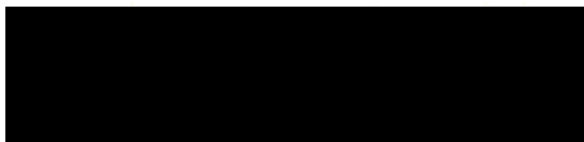

When people look at the new Ashburn Volunteer Fire & Rescue Station 6 they invariably walk away greatly impressed with the beauty of the building. People have literally stopped while walking by and said "Wow". I have heard them. Neighbors have come over solely to take pictures. AVFRD Station 6 is in fact a most beautiful structure.

We all know that a building consists of important but mundane elements such as a foundation, steel beams; studs; drywall, electrical wiring, HVAC and so much more. However, when people look at Station 6 they see a work of art hand crafted by your team of skilled bricklayers. Each brick is properly and squarely placed. Each brick has its own personality, but in this case the whole is so much greater than the sum of the parts. Station 6 is a beautiful yet fully functioning fire and rescue station. One that houses equipment as well as personnel. Life savers all ... all of whom are most proud of the work of your artisans.

As president of AVFRD during the two year build it was my pleasure to interact with your team via the general contractor, Chamberlain Construction. While attending weekly construction meetings it was evident to me that your craftsmen were held in high regard, a compliment well earned.

Thank you for being such an integral part of our construction project. Kindly accept the enclosed holiday cards as a mere token of my deep appreciation for your services rendered. The cards depict to the general public the work of art created by the craftsmen you employ. To paraphrase your company motto, the masonry was indeed just right.

With respect,

Donald R Graham  
President, AVFRD (Ret)
